

Aurora Technologies (SYM023) – Q1 2026 Earnings Call Transcript

Operator: Welcome to Aurora Technologies' first quarter 2026 earnings conference call.

CEO remarks: We delivered a strong start to the year. Cloud revenue accelerated to 31% growth and net revenue retention reached an all-time high. Our new AI product line exceeded expectations and we are raising guidance for both revenue and operating margin. Customer adoption is outstanding and the pipeline is exceptionally healthy.

CFO remarks: Gross margin expanded and free cash flow was very strong. We are increasing our investment in R&D while still expanding profitability, a rare and powerful combination.

Analyst Q&A: Analysts were enthusiastic about the AI momentum. Management expressed high confidence in durable growth and a multi-year expansion opportunity.
